---

## Technical Skills

**Languages**: Javascript, HTML/CSS, PHP
**Databases**: MySQL, MongoDB, Firebase
**Technologies/Frameworks**: ReactJS, Typescript, JQuery, Axios, RESTful API, SCSS/SASS, Material UI, Tailwind CSS, Bootstrap, NodeJS, ExpressJS, Angular, Laravel
**Developer Tools**: VSCode, Git, Github, Gitlab, Figma, Postman

## Certifications

**TOEIC**: Overall score of 855 - IIG Vietnam

## Experience

**Front-end Developer, Intern**                                             **01/2024 - 04/2024**
Alta Software

- Developed responsive recruitment website from Figma designs using HTML, CSS, ReactJS, and TypeScript.
- Integrated Firestore for real-time data management, ensuring scalable and secure user interactions.
- Implemented Firebase authentication with multiple login options, enhancing application security.
- **Tech stack**: HTML, SASS, Typescript, ReactJS, React Redux, Redux Thunk, Firebase, Git.

**Information Technology Support, Part-time**                                **08/2023 - 11/2023**
ISmart Education

- Diagnosed and repaired hardware issues in various devices; performed maintenance to optimize performance.
- Managed software installations and configurations; provided user training and support.

**Programming Teaching Assistant**                                          **03/2023 - 06/2023**
MindX Technology School

- Assisted in delivering programming lectures and labs; provided additional explanations to students.
- Graded assignments and offered constructive feedback to improve students' coding practices.
- Conducted code reviews, guided debugging, and provided technical support for development environments.

## Projects

**DEKAL ENTERPRISE RESOURCE PLANNING (ERP)**                                **01/2024 - 04/2024**
Front-end Developer

- Transformed Figma designs into a responsive ERP and landing page using HTML, Tailwind CSS, jQuery, and Laravel.
- Improved product features and user engagement by contributing and refining use cases.
- Enhanced system performance and user experience by troubleshooting and resolving front-end and back-end bugs.
- **Technology:** Laravel, Tailwind CSS, JQuery, MySQL, Git.
- **Landing page:** dekal.vercel.app
- **Demo:** youtu.be/V_9micKD_40
- **Github:** gitlab.com/hominhquang01/dekal

**ALTA RECRUITMENT**                                         **02/2024 - 04/2024**

Front-end Developer

- Converted Figma designs into a responsive recruitment website using SCSS, ReactJS with TypeScript.
- Implemented real-time data storage and retrieval with Firestore, ensuring data availability and security.
- Developed user authentication and authorization with Firebase Authentication for registration, login, and password reset.
- Utilized React Redux and Redux Thunk for data retrieval and state management.
- **Technology:** ReactJS, SASS, Typescript, React Redux, Redux Thunk, Firebase, Git.
- **Github:** github.com/trietle101/recruit

**CASALOMAN CLOTHING STORE**                                 **10/2023 - 12/2023**

Front-end Developer - Back-end Developer

- Developed a user-friendly front-end for an online clothing store using ReactJS, featuring user authentication, admin management, shopping cart, and secure checkout.
- Implemented a scalable NodeJS server with MongoDB for real-time updates and product management.
- Integrated secure user authentication with JSON Web Token and managed state with React Redux and Redux Thunk.
- **Technology:** ReactJS, SASS, NodeJS, ExpressJS, MongoDB, JSON Web Token, Git.
- **Demo:** casaloman.vercel.app
- **Github:** github.com/trietle101/casaloman

**ROBOPET AI ROBOT STORE**                                   **02/2023 - 04/2023**

Front-end Developer - Designer

- Designed and built components for a client-side e-commerce web application to purchase AI robots for a school project with four other members.
- Features: User authentication, admin product/order management, shopping cart and secure checkout, automated email notifications
- MySQL Implementation: Designed and implemented a MySQL database for user authentication, product management, and order processing.
- **Technology:** PHP, HTML/CSS, Javascript, MySQL, PHPMailer, Git.
- **Demo:** robotpet.atwebpages.com
- **Github:** github.com/trietle101/du-an-1

## Education

**FPT POLYTECHNIC**                                          **01/2022 - 05/2024**

Advanced Diploma in Information Technology, Web Development (GPA: 8.0/10.0)
